EDUCATION

University of Washington, Seattle Jun 2024 – Jun 2025
Master of Science – Business Analytics (STEM)
Relevant Coursework: Big Data Analytics (SQL, Python, R), Data Visualization (Tableau, Power BI), Machine Learning
Feng Chia University, Taiwan Sep 2019 – Jun 2023
Bachelor of Science - Department of Risk Management and Insurance

SKILLS & TOOLS

Data & Programming: SQL, ETL, Python (numpy, pandas, matplotlib), R, Tableau, Power BI, Excel PivotTable, SAS
Business & Project Management: JIRA, Google Suite, GitHub, ERP (Oracle), MS Office, Lean Six Sigma
Certifications: R Programming (Datacamp), Python (Datacamp), EXCEL Modeling (UW Foster)

WORK EXPERIENCE

Economic Development Bureau, Taichung City Government **Taiwan**
BI & Data Analyst, Industry Department Jan 2023 – Mar 2024

- Prevented $10M over-investment and improved KPIs by 2% by architecting a SQL model (CTEs/CASE) to identify 4 profitability drivers; delivered Power BI dashboards that standardize the department-wide budget planning
- Reduced risk exposure by 10% for Taichung's Shopping Festival by engineering a Python-based ETL pipeline and SARIMA models; delivered insights that standardized the mitigation strategy for potential profit loss
- Saved $4.8M in costs and boosted reporting accuracy by 4% by redesigning troubleshooting workflows using Excel PivotTables and Tableau; unified the tracking platform to ensure data integrity across regional operations
- Reduced risk detection time from 5 days to 10 minutes and prevented 20+ escalation cases by automating an Excel-based tracking system; optimized monitoring workflows for 100+ threats to enable proactive intervention

Sheraton Hydropower Engineering Co., Ltd. **Taichung, Taiwan**
Sales & Operations Analyst, Sales Department Jun 2021 – Sep 2022

- Boosted operational profits by 5% by partnering with Philips to identify cost drivers via R-based ARIMA forecasting and A/B testing; architected a resource allocation model that eliminated supply chain bottlenecks
- Secured 600+ new clients and boosted conversion by 10% by architecting an automated lead funnel via Excel VBA and CRM integration; eradicated operational bottlenecks to accelerate regional fulfillment cycles
- Reduced holding costs by $800K and backlog by 12% by developing predictive models via Python to identify demand volatility; collaborated with cross-functional teams to optimize capital and inventory turnover to maximize liquidity
- Generated $7.5M in revenue by architecting real-time Tableau dashboards via SQL ETL; delivered insights on hourly demand volatility and stock to enable cross-functional sales and replenishment pivots across 20+ regions

PROJECT EXPERIENCE

Brooks Running Forecasting Demand 2027, *Business Analyst* (View Dashboard/ View Report) Mar 2025 – Jun 2025

- Generated $6.5M in revenue and cut inventory by 18% by architecting Power BI dashboards to analyze SKU efficiency; translated color trends into data-driven design and marketing strategies across 40+ categories
- Reduced inventory mismatch by 20% by engineering a Python pipeline (Pandas/NumPy) to process 2M+ records; integrated internal and external datasets to uncover demand patterns and drive product development decisions
- Improved forecast accuracy by 15% by developing a Python-based model (Scikit-learn/Statsmodels) to validate inventory availability; automated the detection of supply-demand gaps to secure stock for 2027 apparel launches

New York Hospitals Efficiency Analysis, (UW Contest) *Business Analyst* (View Report) Mar 2025 – Mar 2025

- Optimized data reliability for 1.2M+ discharge records by architecting complex SQL ETL pipelines (CTE/CASE); conducted advanced EDA and feature engineering to uncover operational trends that drove strategic modeling
- Maintained $60M in profit by architecting a segmentation model (K-Means/Regression) to evaluate cost and readmission KPIs; delivered Tableau dashboards to visualize performance clusters and guide strategic pivots
